- ☒ d-methamphetamine
☐ Other:

Highest level observed:

$\leq 0.025 \mu\text{g}/100 \text{ cm}^2$

Location of highest level: HVAC

Analytical method used:

- ☐ EPA (SW-846) Method 8270C/D
☐ NIOSH 9111 DRAFT
☒ NIOSH 9106
☐ Other:

Certification of cleanup:

"I am listed by the Indiana Department of Environmental Management to inspect and clean up properties contaminated with chemicals used in the illegal manufacture of a controlled substance under 318 IAC 1, and my listing was effective on the date this certificate was signed. I have cleaned or supervised cleaning of the property described above as required by 318 IAC 1. I certify that the property described above met all applicable decontamination levels listed in 318 IAC 1-5 at the time of sampling if sampling was required, and that all work required by 318 IAC 1 was performed. I certify, under penalty of perjury as provided in IC 35-44-2-1, that to the best of my knowledge this information is true and accurate."
